PROFESSIONAL SUMMARY

Senior Full Stack Developer with 5+ years of experience building and modernizing scalable enterprise applications using Laravel, React.js, Vue.js and REST APIs. Skilled in back end optimization, React migration, CI/CD workflows, database performance tuning, and reusable architecture design. Experienced in Agile development, enterprise integration, and delivering high-performance applications with zero-downtime deployments.

WORK EXPERIENCE

Kyyba India Pvt Ltd - Senior Software Engineer (Sep 2025 – Present)

- Improved **API response time by 50%** through backend optimization and efficient database query restructuring.
- Accelerated backend **development by 30%** by building reusable Laravel modules, services, and APIs.
- Executed zero-downtime deployments through structured release planning and deployment validation.
- Delivered enterprise features for workflow automation, dashboards, reporting, and task tracking using Laravel and React.js.
- Collaborated within a team of 5–6 developers using Agile/Scrum methodologies.
- Leveraged GitHub Copilot and Claude AI to achieve **3x faster feature delivery**.
- Streamlined CI/CD workflows using Jenkins, GitHub PR reviews, and Jira sprint tracking.

Cloudium Software Pvt Ltd - Software Engineer (Sep 2023 – June 2025)

- Developed responsive web applications using **PHP Laravel and Vue.js**.
- Implemented a new design that enhanced **user experience by 20%** through improved usability.
- Led a team of 4** in developing and testing a key application module, ensuring timely delivery and quality assurance.
- Collaborated directly with clients to gather requirements and deliver tailored software solutions within established timelines.

Spinebiz Pvt Ltd - Software Engineer (Dec 2021 – Aug 2023)

- Collaborated with a team of 15-20, Implemented **RESTful APIs** using Laravel and Lumen frameworks, ensuring seamless data integration across modules.
- Integrated **O-Auth based authentication**, securing user access for 500+ accounts.
- Improved API performance by 15% by optimizing SQL queries.

Augmentuss Automations LLP - Web Developer (Oct 2020 – Dec 2021)

- Integrated Socialite login (**Google, Linked-In**), increasing user sign-ups by 40%.
- Led deployment** and post-launch maintenance, ensuring 99% uptime.
- Spearheaded the front-end development, ensuring mobile responsiveness and optimal user experience.
- Designed, implemented, and maintained relational database to ensure data integrity, scalability, and high performance.
- Improved code quality and dev efficiency by actively participating in peer **code reviews**.

PROJECTS

Programplus - Enterprise Program Management Platform

Full Stack Developer | PHP, Laravel, React.js

- Revamped the legacy Laravel + Blade application into a React.js front-end with API-driven architecture, improving scalability and maintainability.
- Developed enterprise modules for workflow automation, financial tracking, dashboards, reporting, and third-party system integration.
- Contributed to on-boarding new enterprise clients after the modernization initiative and enhanced platform capabilities.
- Achieved 3x faster feature delivery using GitHub Copilot-assisted development and optimized engineering workflows. .

Prescribery - A Comprehensive Telemedicine Platform

Full Stack Developer | PHP, Laravel, Vue.js

- **Optimized UI performance** by eliminating redundant API calls and implementing asynchronous data fetching using `async/await`, improving responsiveness and reducing load time by 15%.
- Developed dynamic and responsive web pages using **Laravel, Vue.js and MySQL**, improving site load speed by 10%.
- Collaborated in code reviews to maintain code quality and reduce deployment issues.

Be Right Here - A Workspace Discovery Platform

Backend Developer | Lumen, React.js, MySQL

- Designed and implemented backend APIs using Lumen microservice, reducing data retrieval time by 20%.
- Implemented user authentication with passport authentication ensuring data protection for 1000+ users.
- Integrated **AWS S3 and Swagger** for seamless cloud storage and API documentation.
- Implemented and optimized database schema changes to support high-scale operations and improve system performance.

DL Homes - Glass & Hostel Management Application

Full Stack Developer | Laravel, MySQL, JQuery, Ajax, HTML, CSS

- Independently designed and developed **full-stack web applications**, including a hostel management system and an internal operations tool for a glass retail business, handling both backend logic and frontend implementation end-to-end.
- Integrated **email notifications** and automated PDF invoice delivery via **Google Drive**, enabling users to access and share documents directly—reducing manual effort by 30%
- Managed and implemented database schema changes, ensuring data integrity and minimal downtime during deployments.
- Collaborated with clients to gather requirements and conducted product demos to ensure alignment with business objectives.

SKILLS

- **Backend:** PHP, Laravel, Lumen, REST APIs
- **Frontend:** React.js, Vue.js, JavaScript, jQuery, HTML5, CSS3, Bootstrap
- **Database & Cloud:** MySQL, SQL Server, AWS S3
- **Tools & Platforms:** GitHub, GitLab, Jenkins, Jira, AWS S3, Swagger, VS Code, Claude AI, GitHub Copilot
- **Development Practices:** Agile/Scrum, Code Reviews, API Integration, Performance Optimization, CI/CD, Responsive Design, Release Planning, Deployment Validation, Reusable Architecture Design

EDUCATION

CSVTU Bhilai, Chhattisgarh, India | 2015-2019

Bachelor of Engineering in Computer Science (CGPA -7.1/10)
